Note - 4 Basis of consolidation

Subsidiaries

The Reformatted Consolidated Financial Information comprise financial statements of the Holding Company and its subsidiaries. Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. The Group can have power over the investee even if it owns less than majority voting rights i.e. rights arising from other contractual arrangements. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases. Statement of profit and loss [including other comprehensive income ('OCI')] of subsidiaries acquired or disposed of during the period are recognized from the effective date of acquisition, or up to the effective date of disposal, as applicable.

The Group combines the financial statements of the Holding Company and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Non-controlling interests, presented as part of equity, represent the portion of a subsidiary's statement of profit and loss and net assets that is not held by the Group. Statement of profit and loss balance [including other comprehensive income ('OCI')] is attributed to the equity holders of the Holding Company and to the non-controlling interest basis the respective ownership interests and such balance is attributed even if this results in controlling interests having a deficit balance.

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the group. Such a change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognized within equity.

Associate

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control those policies. Investments in associates are accounted for using the equity method of accounting, after initially being recognised at cost.

Interest in associates are accounted for using the equity method, after initially being recognized at cost. The carrying amount of the investment is adjusted thereafter for the post acquisition change in the share of net assets of the investee, adjusted where necessary to ensure consistency with the accounting principles and policies of the Group. The consolidated statement of profit and loss (including the other comprehensive income) includes the Group's share of the results of the operations of the investee. Dividends received or receivable from associates are recognized as a reduction in the carrying amount of the investment. Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interests in associates.

Note - 4 Basis of consolidation (continued)

The Group applies the acquisition method in accounting for business combinations. The consideration transferred by the Group to obtain control of a subsidiary is calculated as the sum of the acquisition-date fair values of assets transferred, liabilities incurred and the equity interests issued by the Group. Acquisition costs are expensed as incurred.

Business combination

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their acquisition-date fair values. Goodwill is measured as excess of the aggregate of the fair value of the consideration transferred, the amount recognized for non-controlling interests and fair value of any previous interest held, over the fair value of the net of identifiable assets acquired and liabilities assumed. If the fair value of the net of identifiable assets acquired and liabilities assumed is in excess of the aggregate mentioned above, the resulting gain on bargain purchase is recognized in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognizes the gain directly in equity as capital reserve, without routing the same through other comprehensive income.

Business combinations involving entities or businesses under common control have been accounted for using the pooling of interest method. The assets and liabilities of the combining entities are reflected at their carrying amounts. No adjustments have been made to reflect fair values, or to recognize any new assets or liabilities.

Note - 5 Summary of significant accounting policies

I Significant management judgement in applying accounting policies and estimation uncertainty

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the related disclosures. Actual results may differ from these estimates.

Significant management judgements

Recognition of deferred tax assets - The extent to which deferred tax assets can be recognized is based on an assessment of the probability of the future taxable income against which the deferred tax assets can be utilized.

Business model assessment - The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Group monitors financial assets measured at amortised cost that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Group's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets.

Evaluation of indicators for impairment of assets - The evaluation of applicability of indicators of impairment of assets requires assessment of several external and internal factors which could result in deterioration of recoverable amount of the assets.

Impairment of financial assets - The evaluation of applicability of indicators of impairment of assets requires assessment of several external and internal factors which could result in deterioration of recoverable amount of the assets.

Expected credit loss ('ECL') - The measurement of expected credit loss allowance for financial assets measured at amortised cost requires use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. likelihood of customers defaulting and resulting losses). The Group makes significant judgements with regard to the following while assessing expected credit loss:

- Determining criteria for significant increase in credit risk;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.

Provisions - At each balance sheet date basis the management judgment, changes in facts and legal aspects, the Group assesses the requirement of provisions against the outstanding contingent liabilities. However, the actual future outcome may be different from this judgement.

Significant estimates

Useful lives of depreciable/amortisable assets - Management reviews its estimate of the useful lives of depreciable/amortisable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical and economic obsolescence that may change the utility of assets.

Defined benefit obligation (DBO) - Management's estimate of the DBO is based on a number of underlying assumptions such as standard rates of inflation, mortality, discount rate and anticipation of future salary increases. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expenses.

Fair value measurements - Management applies valuation techniques to determine the fair value of financial instruments (where active market quotes are not available). This involves developing estimates and assumptions consistent with how market participants would price the instrument.

Note - 5

II Summary of significant accounting policies

The Reformatted Consolidated Ind AS Financial Information have been prepared using the significant accounting policies and measurement bases summarised below. These were used throughout all periods presented in the Reformatted Consolidated Ind AS Financial Information, except where the Group has applied certain accounting policies and exemptions upon transition to Ind AS.

a. Property, plant and equipment

Recognition and initial measurement

Property, plant and equipment are stated at their cost of acquisition. The cost comprises purchase price, borrowing cost if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discount and rebates are deducted in arriving at the purchase price. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group. All other repair and maintenance costs are recognised in consolidated statement of profit and loss as incurred.

Subsequent measurement (depreciation and useful lives)

Property, plant and equipment are subsequently measured at cost less accumulated depreciation and impairment losses. Depreciation on property, plant and equipment is provided on a straight-line basis, computed on the basis of useful lives prescribed in Schedule II to the Companies Act, 2013. Leasehold improvements are amortised over the duration of the lease.

Asset class	Useful life
Furniture and fixtures	10 years
Vehicles	8-10 years
Office equipment	5 years
Computer equipment	3 years
Server and Networks	6 years
Leasehold improvements	Over the period of lease

Property, plant and equipment individually costing up to INR 5,000 are fully depreciated in the year of acquisition. Depreciation is calculated on pro rata basis from the date on which the asset is ready for use or till the date the asset is sold or disposed.

The residual values, useful lives and method of depreciation are reviewed at the end of each financial year.

De-recognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognized in the consolidated statement of profit and loss, when the asset is derecognised.

b. Intangible assets

Recognition and initial measurement

Intangible assets are stated at their cost of acquisition. The cost comprises purchase price, borrowing cost if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use.

Subsequent measurement (amortisation method, useful lives and residual value)

Asset class	Useful life
Software	3 - 10 years

Intangible assets are amortised from the date when the assets are available for use. The estimated useful life (amortisation period) of the intangible assets is arrived basis the expected pattern of consumption of economic benefits and is reviewed at the end of each financial year and the amortisation period is revised to reflect the changed pattern, if any.

The Company had developed a software that is used to enhance the company's business in e-wallet segment. Useful life of that software were estimated 4 year basis the expected economic benefit from the software. However, the company has reassessed the expected pattern of consumption of economic benefit basis technical estimate of the software and expect benefits will flow to the Company till 10 years.

c. Intangible assets under development

Intangible assets under development represents expenditure incurred in respect of intangible assets under development and are carried at cost. Cost includes development cost, borrowing costs and other direct expenditure necessary to create, produce and prepare the asset to be capable of operating in the manner intended by management. These are recognised as assets when the Group can demonstrate following recognition requirements:

- The development costs can be measured reliably
- The project is technically and commercially feasible
- The Group intends to and has sufficient resources to complete the project
- The Group has the ability to use or sell the such intangible asset
- The asset will generate probable future economic benefits.

Amortisation of the asset begins when development is complete and the asset is available for use.

d. Revenue recognition

Revenue (other than for those items to which Ind AS 109 Financial Instruments are applicable) is measured at fair value of the consideration received or receivable. Ind AS 115, Revenue from contracts with customers, outlines a single comprehensive model of accounting for revenue arising from contracts with customers.

The Group recognises revenue from contracts with customers based on a five step model as set out in Ind AS 115:

Step 1: Identify contract(s) with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.

Step 2: Identify performance obligations in the contract: A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer.

Step 3: Determine the transaction price: The transaction price is the amount of consideration to which the Group expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties.

Step 4: Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the Group allocates the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Group expects to be entitled in exchange for satisfying each performance obligation.

Step 5: Recognise revenue when (or as) the Group satisfies a performance obligation.

The Group recognises revenue from the following sources:

Interest income

Interest income on a financial asset at amortised cost is recognised on a time proportion basis taking into account the amount outstanding and the effective interest rate ('EIR'). The EIR on financial asset after netting off the fees received and cost incurred approximates the effective interest rate of return for the financial asset. The future cash flows are estimated taking into account all the contractual terms of the instrument.

Income from assignment transactions

Gains arising out of direct assignment transactions comprise the difference between the interest on the loan portfolio and the applicable rate at which the direct assignment is entered into with the assignee, also known as the right of excess interest spread (EIS). The future EIS basis the scheduled cash flows on execution of the transaction, discounted at the applicable rate entered into with the assignee is recorded upfront in the statement of profit and loss. EIS evaluated and adjusted for ECL and expected prepayment.

Interest on investments and deposits

Interest income is recorded on accrual basis using the effective interest rate (EIR) method.

Commission income

Income from commissions / brokerage is recognised on accrual basis, generally as set out under the terms of contracts / agreements with respective customer.

Revenue from Digital Wallet Service & Merchant Fee

Revenue from digital services is recognized for providing payment gateway aggregation services and as a platform for merchant transactions executed through the wallets provided to customers through payment gateways, on a periodic basis as and when transactions are settled. Wallet maintenance fees in relation to facilitating wallet transactions and maintenance of related technical platforms is recognized on an accrual basis. Merchant fees from wallet transaction are recognized on the basis of successful pay-out of wallet usage to the respective merchants. The settlements are done daily for such transactions with the merchants. Revenue from banking correspondence services are recognised on accrual basis in accordance with the terms and conditions of the underlying mandates entered into with bank. The Group provides card enabled prepaid payment program management and remittance services. In such contracts, revenue is recognised as and when transactions are done through cards.

II Summary of significant accounting policies (continued)

Dividend income

Dividend income is recognised when the right to receive payment of the dividend is established, it is probable that the economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

Net gain on fair value changes

The Group designates certain financial assets for subsequent measurement at fair value through profit or loss (FVTPL) or fair value through other comprehensive income (FVOCI). The Group recognises gains on fair value change of financial assets measured at FVTPL and realised gains on derecognition of financial asset measured at FVTPL and FVOCI on net basis.

Miscellaneous income

All other income is recognized on an accrual basis, when there is no uncertainty in the ultimate realization/collection.

e. Borrowing costs

Borrowing costs directly attributable to the acquisition and/or construction of a qualifying asset are capitalized during the period of time that is necessary to complete and prepare the asset for its intended use or sale. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. All other borrowing costs are charged to the consolidated statement of profit and loss as incurred basis the effective interest rate method.

f. Taxation

Tax expense recognized in consolidated statement of profit and loss comprises the sum of deferred tax and current tax except the ones recognized in other comprehensive income or directly in equity.

Current tax is determined as the tax payable in respect of taxable income for the year and is computed in accordance with relevant tax regulations. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity).

Current tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

Minimum alternate tax ('MAT') credit entitlement is recognised as an asset only when and to the extent there is convincing evidence that normal income tax will be paid during the specified period. In the year in which MAT credit becomes eligible to be recognised as an asset, the said asset is created by way of a credit to the consolidated statement of profit and loss and shown as MAT credit entitlement. This is reviewed at each balance sheet date and the carrying amount of MAT credit entitlement is written down to the extent it is not reasonably certain that normal income tax will be paid during the specified period.

Deferred tax is recognised in respect of temporary differences between carrying amount of assets and liabilities for financial reporting purposes and corresponding amount used for taxation purposes. Deferred tax assets on unrealised tax loss are recognised to the extent that it is probable that the underlying tax loss will be utilised against future taxable income. This is assessed based on the Group's forecast of future operating results, adjusted for significant non-taxable income and expenses and specific limits on the use of any unused tax loss. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date to recover or settle the carrying amount of its assets and liabilities. Deferred tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously. Deferred tax relating to items recognised outside statement of profit and loss is recognised outside consolidated statement of profit and loss (either in other comprehensive income or in equity).

g. Employee benefits

Short-term employee benefits

Short-term employee benefits comprise of employee costs such as salaries, bonus etc. is recognized on the basis of the amount paid or payable for the period during which services are rendered by the employee.

Other long-term employee benefits

The Group also provides the benefit of compensated absences to its employees which are in the nature of long-term employee benefit plan. Liability in respect of compensated absences becoming due and expected to availed after one year from the Balance Sheet date is estimated in the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method as on the reporting date. Actuarial gains and losses arising from past experience and changes in actuarial assumptions are charged to consolidated statement of profit and loss in the year in which such gains or losses are determined.

Post-employment benefit plans are classified into defined benefits plans and defined contribution plans as under:

Defined contribution plans

The Group has a defined contribution plans namely provident fund, pension fund, labour welfare fund and employees state insurance scheme. The contribution made by the Group in respect of these plans are charged to the consolidated statement of profit and loss.

Defined benefit plans

The Group has unfunded gratuity as defined benefit plan where the amount that an employee will receive on retirement is defined by reference to the employee's length of service and final salary. The liability recognised in the balance sheet for defined benefit plans as the present value of the defined benefit obligation (DBO) at the reporting date. Management estimates the DBO annually with the assistance of independent actuaries. Actuarial gains/losses resulting from re-measurements of the liability are included in other comprehensive income.

h. Share based payments

Share based compensation benefits are provided to employees via Dhani Services Limited (formerly, Indiabulls Ventures Limited) ('Ultimate Holding Company') Employee Stock Option Plans (ESOPs). The employee benefits expense is measured using the fair value of the employee stock options and is recognised over vesting period with a corresponding increase in equity. The vesting period is the period over which all the specified vesting conditions are to be satisfied. On the exercise of the employee stock options, the employees of the Holding Company will be allotted Ultimate Holding Company's equity shares.

i. Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term highly liquid investments that are readily convertible into known amount of cash and which are subject to an insignificant risk of changes in value. For cash flow statement purposes, cash and cash equivalents includes bank overdrafts that are repayable on demand and form an integral part of the Group's cash management.

j. Provisions, contingent assets and contingent liabilities

Provisions are recognized only when there is a present obligation, as a result of past events, and when a reliable estimate of the amount of obligation can be made at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. Provisions are discounted to their present values, where the time value of money is material.

Contingent liability is disclosed for:

- Possible obligations which will be confirmed only by future events not wholly within the control of the Group or
- Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

Contingent assets are neither recognised nor disclosed except when realisation of income is virtually certain, related asset is disclosed.

II Summary of significant accounting policies (continued)

k. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Initial recognition and measurement

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value adjusted for transaction costs. Subsequent measurement of financial assets and financial liabilities is described below.

Non-derivative financial assets

Subsequent measurement

i. Financial assets carried at amortised cost – a financial asset is measured at the amortised cost if both the following conditions are met:

- a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in interest income in the Statement of Profit and Loss.

ii. Financial assets carried at fair value through other comprehensive income (FVOCI):

A financial asset is measured at FVOCI if both the following conditions are met:

- (a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows and selling financial assets, and
- (b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

FVOCI instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI. Interest income and impairment gains or losses are recognised in the statement of profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified to the statement of profit or loss.

iii. Investments in equity instruments – Investments in equity instruments which are held for trading are classified as at fair value through profit or loss (FVTPL). For all other equity instruments, the Group makes an irrevocable choice upon initial recognition, on an instrument by instrument basis, to classify the same either as at fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL). Amounts presented in other comprehensive income are not subsequently transferred to profit or loss. However, the Group transfers the cumulative gain or loss within equity. Dividends on such investments are recognised in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment.

iv. Investments in mutual funds – Investments in mutual funds are measured at fair value through profit and loss (FVTPL).

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a nonfinancial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

In order to show how fair values have been derived, financial instruments are classified based on a hierarchy of valuation techniques, as summarised below:

Level 1 financial instruments: Those where the inputs used in the valuation are unadjusted quoted prices from active markets for identical assets or liabilities that the Group has access to at the measurement date. The Group considers markets as active only if there are sufficient trading activities with regards to the volume and liquidity of the identical assets or liabilities and when there are binding and exercisable price quotes available on the balance sheet date.

Level 2 financial instruments: Those where the inputs that are used for valuation and are significant, are derived from directly or indirectly observable market data available over the entire period of the instrument's life.

Level 3 financial instruments: Those that include one or more unobservable input that is significant to the measurement as whole. Based on the Group's business model for managing the investments, the Group has classified its investments and securities for trade at FVTPL. Financial liabilities are carried at amortised cost using the effective interest rate method. For trade and other payables the carrying amount approximates the fair value due to short maturity of these instruments.

II Summary of significant accounting policies (continued)

De-recognition of financial assets

Financial assets (or where applicable, a part of financial asset or part of a group of similar financial assets) are derecognised (i.e. removed from the Group's balance sheet) when the contractual rights to receive the cash flows from the financial asset have expired, or when the financial asset and substantially all the risks and rewards are transferred. Further, if the Group has not retained control, it shall also derecognise the financial asset and recognise separately as assets or liabilities any rights and obligations created or retained in the transfer.

Non-derivative financial liabilities

Subsequent measurement

Subsequent to initial recognition, all non-derivative financial liabilities are measured at amortised cost using the effective interest method.

De-recognition of financial liabilities

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the consolidated statement of profit and loss.

Convertible debentures

Convertible debentures are separated into liability and equity components basis the terms of the contract. On issuance of the convertible debentures, the fair value of the liability component is determined using a market rate for an equivalent non-convertible instrument. This amount is classified as financial liability measured at amortised cost until it is extinguished on conversion. The remainder of the proceeds is recognised in equity since conversion option meets the fixed for fixed criteria.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Derivative contracts

The Group enters into certain derivative contracts to hedge risks which are not designated as hedges. Such contracts are accounted for at fair value through profit and loss using mark to market information.

The Group also enters into certain derivative contracts (futures) to hedge risks which are designated as hedges of the fair value of recognised assets i.e. investment in equity instrument (fair value hedge). For hedge assessment, the hedging relationship must meet conditions with respect to documentation, strategy and economic relationship of the hedged transaction. In case of fair value, the change in fair value of derivative is recognised in the consolidated statement of profit and loss along with change in fair value of underlying asset.

I. Impairment of financial assets

In accordance with Ind AS 109, the Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss for financial assets. The Group factors historical trends and forward looking information to assess expected credit losses associated with its assets and impairment methodology applied depends on whether there has been a significant increase in credit risk.

Loan assets

The Group follows a 'three-stage' model for impairment based on changes in credit quality since initial recognition as summarised below:

· **Stage 1** (1-30 days) includes loan assets that have not had a significant increase in credit risk since initial recognition or that have low credit risk at the reporting date.

· **Stage 2** (31-60 days) includes loan assets that have had a significant increase in credit risk since initial recognition but that do not have objective evidence of impairment.

· **Stage 3** (more than 90 days) includes loan assets that have objective evidence of impairment at the reporting date.

The Expected Credit Loss (ECL) is measured at 12-month ECL for Stage 1 loan assets and at lifetime ECL for Stage 2 and Stage 3 loan assets. ECL is the product of the Probability of Default, Exposure at Default and Loss Given Default, defined as follows:

Probability of Default (PD) - The PD represents the likelihood of a borrower defaulting on its financial obligation (as per "Definition of default and credit-impaired" above), either over the next 12 months (12 months PD), or over the remaining lifetime (Lifetime PD) of the obligation.

Loss Given Default (LGD) - LGD represents the Group's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and preference of claim and availability of collateral or other credit support.

II Summary of significant accounting policies (continued)

Exposure at Default (EAD) - EAD is based on the amounts the Group expects to be owed at the time of default. For a revolving commitment, the Group includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.

Forward-looking economic information is included in determining the 12-month and lifetime PD, EAD and LGD. The assumptions underlying the expected credit loss are monitored and reviewed on an ongoing basis.

Trade receivables

In respect of trade receivables, the Group applies the simplified approach of Ind AS 109, which requires measurement of loss allowance at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument.

Other financial assets

In respect of its other financial assets, the Group assesses if the credit risk on those financial assets has increased significantly since initial recognition. If the credit risk has not increased significantly since initial recognition, the Group measures the loss allowance at an amount equal to 12-month expected credit losses, else at an amount equal to the lifetime expected credit losses.

When making this assessment, the Group uses the change in the risk of a default occurring over the expected life of the financial asset. To make that assessment, the Group compares the risk of a default occurring on the financial asset as at the balance sheet date with the risk of a default occurring on the financial asset as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition. The Group assumes that the credit risk on a financial asset has not increased significantly since initial recognition if the financial asset is determined to have low credit risk at the balance sheet date.

Write-offs

Financial assets are written off either partially or in their entirety to the extent that there is no realistic prospect of recovery. Any subsequent recoveries are credited to impairment on financial instrument in consolidated statement of profit and loss.

m. Impairment of non-financial assets

At each reporting date, the Group assesses whether there is any indication that an asset may be impaired. If any such indication exists, the Group estimates the recoverable amount of the asset. Recoverable amount is higher of an asset's net selling price and its value in use. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the consolidated statement of profit and loss. If at the reporting date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount.

n. Earnings per equity share

Basic earnings per equity share is calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events including a bonus issue.

For the purpose of calculating diluted earnings equity per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

o. Segment reporting

The Group identifies segment basis the internal organization and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit/loss amounts are regularly reviewed by the CODM ('chief operating decision maker') in deciding how to allocate resources and in assessing performance.

p. Foreign currency

Functional and presentation currency

Items included in the financial statement of the Group are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The Reformatted Consolidated Ind AS Financial Information have been prepared and presented in Indian Rupees (INR), which is the Holding Company's functional and presentation currency.

Transactions and balances

Foreign currency transactions are recorded in the functional currency, by applying to the exchange rate between the functional currency and the foreign currency at the date of the transaction. Foreign currency monetary items outstanding at the balance sheet date are converted to functional currency using the closing rate. Non-monetary items denominated in a foreign currency which are carried at historical cost are reported using the exchange rate at the date of the transaction.

Exchange differences arising on monetary items on settlement, or restatement as at reporting date, at rates different from those at which they were initially recorded, are recognized in the consolidated statement of profit and loss in the year in which they arise.

II Summary of significant accounting policies (continued)

q. Classification of leases -

The Group enters into leasing arrangements for various premises. The assessment (including measurement) of the lease is based on several factors, including, but not limited to, transfer of ownership of leased asset at end of lease term, lessee's option to extend/terminate etc. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to extend or to terminate.

Leases

Till previous year, assets acquired on leases where a significant portion of risk and rewards of ownership are retained by the lessor are classified as operating leases. Lease rental are charged to statement of profit and loss on straight-line basis except where scheduled increase in rent compensate the lessor for expected inflationary costs.

For any new contracts entered into on or after 1 April 2019, the Group considers whether a contract is, or contains a lease (the transition approach has been explained and disclosed in Note 46). A lease is defined as 'a contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration'.

Classification of leases

The Group enters into leasing arrangements for various assets. The assessment of the lease is based on several factors, including, but not limited to, transfer of ownership of leased asset at end of lease term, lessee's option to extend/purchase etc.

Recognition and initial measurement

At lease commencement date, the Group recognises a right-of-use asset and a lease liability on the balance sheet. The right-of-use asset is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Group, an estimate of any costs to dismantle and remove the asset at the end of the lease (if any), and any lease payments made in advance of the lease commencement date (net of any incentives received).

Subsequent measurement

The Group depreciates the right-of-use assets on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The Group also assesses the right-of-use asset for impairment when such indicators exist.

At lease commencement date, the Group measures the lease liability at the present value of the lease payments unpaid at that date, discounted using the interest rate implicit in the lease if that rate is readily available or the Groups incremental borrowing rate. Lease payments included in the measurement of the lease liability are made up of fixed payments (including in substance fixed payments) and variable payments based on an index or rate. Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest. It is re-measured to reflect any reassessment or modification, or if there are changes in in-substance fixed payments. When the lease liability is re-measured, the corresponding adjustment is reflected in the right-of-use asset.

The Group has elected to account for short-term leases using the practical expedients. Instead of recognising a right-of-use asset and lease liability, the payments in relation to these are recognised as an expense in statement of profit and loss on a straight-line basis over the lease term.

r. Dividend

Provision is made for the amount of any dividend declared on or before the end of the reporting period but not distributed at the end of the reporting period, being appropriately authorised and no longer at the discretion of the Company. The final dividend on shares is recorded as a liability on the date of approval by the shareholders, and interim dividends are recorded as a liability on the date of declaration by the Company's Board of Directors.

Leases

The Group has leases for office buildings. With the exception of short-term leases and leases of low-value underlying assets, each lease is reflected on the balance sheet as a right-of-use asset and a lease liability. Variable lease payments which do not depend on an index or a rate are excluded from the initial measurement of the lease liability and right of use "ROU" assets. The Group classifies its right-of-use assets in a consistent manner to its property, plant and equipment.

Each lease generally imposes a restriction that, unless there is a contractual right for the Group to sublease the asset to another party, the right-of-use asset can only be used by the Group. Some leases contain an option to extend the lease for a further term. The Group is prohibited from selling or pledging the underlying leased assets as security. For leases over office buildings and other premises the Group must keep those properties in a good state of repair and return the properties in their original condition at the end of the lease. Leases (continued):

H Impact on transition

- 1 Effective 1 April 2019, the Group has adopted Ind AS 116 "Leases" and applied modified retrospective approach to all lease contracts existing as at 1 April 2019. On transition, the adoption of new standard resulted in recognition of lease liability of ₹ 2,314.65 Million and corresponding right of use asset of ₹ 2,338.97 Million.
- 2 For contracts in place as at 1 April 2019, Group has elected to apply the definition of a lease from Ind AS 17 and has not applied Ind AS 116 to arrangements that were previously not identified as lease under Ind AS 17.
- 3 The Group has elected not to include initial direct costs in the measurement of the right-of-use asset for operating leases in existence at the date of initial application of Ind AS 116, being 1 April 2019.
- 4 Instead of performing an impairment review on the right-of-use assets at the date of initial application, the Company has relied on its historic assessment as to whether leases were onerous immediately before the date of initial application of Ind AS 116.
- 5 On transition, for leases previously accounted for as operating leases with a remaining lease term of less than 12 months and for leases of low-value assets the Group has applied the optional exemptions to not recognise right-of-use assets but to account for the lease expense on a straightline basis over the remaining lease term.
- 6 For those leases previously classified as finance leases, the right-of-use asset and lease liability are measured at the date of initial application at the same amounts as under Ind AS 17 immediately before the date of initial application.
- 7 On transition to Ind AS 116 the weighted average incremental borrowing rate applied to lease liabilities recognised was 10.50%.
- 8 The following is a reconciliation of total operating lease commitments at 31 March 2019 (as disclosed in the financial statements for the year ended 31 March 2019) to the lease liabilities recognised at 1 April 2019:

(iii) Other long term employee benefit plans

The Group provides for compensated absences to its employees. The employees can carry-forward a portion of the unutilised accrued compensated absences and utilise it in future service periods or receive cash compensation on termination of employment. Since the compensated absences do not fall due wholly within twelve months after the end of the period in which the employees render the related service and are also not expected to be utilized wholly within twelve months after the end of such period, the benefit is classified as a long-term employee benefit. The Group records an obligation for such compensated absences in the period in which the employee renders the services that increase this entitlement. The scheme is unfunded and liability for the same is recognised on the basis of actuarial valuation. A provision of ₹ 15.11 million has been reversed (31 March 2020: ₹ 59.27 million and 31 March 2019: ₹ 16.31 million provision created) for the year on the basis of actuarial valuation at the year end and credit to the statement of profit and loss.

The categories used are as follows:

Level 1: Quoted prices (unadjusted) for identical instruments in an active market;

Level 2: Directly (i.e. as prices) or indirectly (i.e. derived from prices) observable market inputs, other than Level 1 inputs; and

Level 3: Inputs which are not based on observable market data (unobservable inputs).

The management assessed that fair values of cash and cash equivalents, other financial assets and other financial liabilities approximate their respective carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

Financial instruments measured at fair value and fair value of financial instruments carried at amortized cost.

Type	Valuation technique	Significant unobservable input	Inter-relationship between significant unobservable inputs and fair value and sensitivity
Financial assets and liabilities measured at amortized cost	Discounted cash flows: The valuation model considers the present value of expected receipt/payment discounted using appropriate discounting rates	Not applicable	Not applicable
Financial assets measured at FVTPL	NAV based method.	Not applicable	Not applicable
Financial assets measured at FVOCI	Discounted cash flows: The valuation model considers the present value of expected receipt/payment discounted using appropriate discounting rates.	The discount rate is the average lending rate at which the loans are disbursed	There is an inverse correlation. Higher the discount rate i.e average lending rate for the disbursed loans, lower the fair value of the assets

ii) Assets

The Group's term deposits and commercial paper/deposits are carried at amortised cost and are fixed rate deposits. Capital Management

The Group's capital management objectives are

- to ensure the Group's ability to continue as a going concern
- to comply with externally imposed capital requirement and maintain strong credit ratings
- to provide an adequate return to shareholders

Management assesses the Group's capital requirements in order to maintain an efficient overall financing structure while avoiding excessive leverage. This takes into account the subordination levels of the Group's various classes of debt. The Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt.

Fair value hedges

A. Risk management strategy

The use of derivatives can give rise to price risk. The use of derivative instruments is subject to limits, authorities and regular monitoring by appropriate levels of management. The limits, authorities and monitoring systems are periodically reviewed by management and the Board. The price risk on derivatives is mitigated by changes in the valuation of the underlying assets, liabilities or transactions, as derivatives are used only for risk management purposes. The Group uses derivative instruments as part of its management of exposure to fluctuations in market price of equity investments. The derivative transactions are normally in the form of futures and these are subject to the Group guidelines and policies.

B. Hedge relationship

The Group has done investment in shares of Reliance Industries Limited. The Group enters into selling of future of Reliance Industries Limited to hedge its price risk. Gains and losses on these hedge transactions are substantially offset by the amount of gains or losses on the underlying assets. Net gains and losses are recognized in the statement of profit and loss.

Hedge ratio is the relationship between the quantity of the hedging instrument and the quantity of the hedged item. In the case, total principal payments under the transaction is hedged with futures of the equivalent amount and at the same dates. Hence the entity hedge 100% of its exposure on the transaction and is considered highly effective. The Group has entered into nifty future contracts which provide an economic hedge to a risk component of a transaction.

C. Other hedge related disclosures

The fair value of the Group's derivative positions recorded under derivative financial liabilities are as follows:

Transferred financial assets

A) Securitisation

In the course of its finance activity, the Group makes transfers of financial assets, where legal rights to the cash flows from the asset are passed to the counterparty and where the Group retains the rights to the cash flows but assumes a responsibility to transfer them to the counterparty.

The Group has securitized its loan assets to an unrelated and unconsolidated entities. As per the terms of the agreements, the Group is exposed to first loss default guarantee and cash collateral amounting in range of 14% to 18% of the amount securitised and therefore continues to be exposed to significant risk and rewards relating to the underlying receivables. Hence, these loan assets are not derecognised and proceeds received are presented as borrowings (other than debt securities).

The following tables provide a summary of financial assets that have been transferred in such a way that part or all of the transferred financial assets do not qualify for derecognition, together with the associated liabilities:

Securitisations	As at 31 March 2021	As at 31 March 2020	As at 31 March 2019
Gross carrying amount of securitised assets	3,172.16	8,911.25	4,219.70
Gross carrying amount of associated liabilities	4,083.87	9,215.61	4,082.86
Carrying value and fair value of securitised assets	4,893.50	9,256.79	4,311.20
Carrying value and fair value of associated liabilities	4,083.87	9,215.61	4,082.85
Net position	809.63	41.19	228.35

B) Assignment

During the year ended 31 March 2020, the Group has sold certain loans by way of direct bilateral assignment, as a source of finance. As per the terms of such deals, since the derecognition criteria as per Ind AS 109 are met, (including transfer of substantial risks and rewards) relating to assets being transferred to the buyer, the assets have been derecognised from the books of the Group.

The table below summarises the carrying amount of the derecognised financial assets measured at amortised cost and the gain/(loss) on derecognition.

Particulars	As at 31 March 2021	As at 31 March 2020	As at 31 March 2019
Carrying amount of de-recognised financial asset	3,671.10	58,883.79	6,064.81
Gain on sale of the de-recognised financial asset	254.97	6,166.90	325.76

Since the Group has derecognized the above loan assets in entirety, the whole of the interest spread at the present value (discounted over the expected life of the assets) is recognised on the date of derecognition itself as interest-only strip receivable and corresponding profit on derecognition of financial assets is recognized in the Statement of Profit and Loss.

Note - 60

Consequent to the outbreak of the COVID-19 pandemic, the Indian Government announced a lockdown in March 2020. Subsequently, the national lockdown was lifted by the Government, but regional lockdowns continue to be implemented in areas with a significant number of COVID-19 cases. The impact of COVID-19, including changes in customer behavior and pandemic fears, as well as restriction of business and individual activities led to significant volatility in global and Indian financial markets and a significant decrease in global and local economic activities. This may lead to a rise in the number of borrower defaults and consequently an increase in corresponding provisions. The extent to which COVID-19 pandemic, including the current "second wave" that has significantly increased the number of cases in India, will continue to impact the Company's performance and will depend on ongoing as well as future developments which are highly uncertain, including, among other things, any new information concerning the severity of the COVID-19 pandemic and any action to contain its spread or mitigate its impact whether government-mandated or elected by us.

The Group has recognized provisions as on 31 March 2021 towards its loan assets, based on the information available at this point of time, in accordance with the expected credit loss method. The Group believes that it has considered all the possible impact of the known events arising out of COVID-19 pandemic in the preparation of consolidated financial statements. However, the impact assessment of COVID-19 is a continuing process given its nature and duration. The Group will continue to monitor any material changes to future economic condition.

The Group's capital and liquidity position remains sufficient and would continue to be the focus area for the Company; accordingly, the Company does not expect a stress on its liquidity situation in the immediate future.

The cost comprises purchase price, borrowing cost if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discount and rebates are deducted in arriving at the purchase price. All other repair and maintenance costs are recognised in statement of profit and loss.

Subsequent measurement (depreciation method, useful lives and residual value)

Property, plant and equipment are subsequently measured at cost less accumulated depreciation and impairment losses. Depreciation on property, plant and equipment is provided on the straight line method over the useful life of the assets as prescribed under Part 'C' of Schedule II of the Act.

Asset class	Useful life

The residual values, useful lives and method of depreciation are reviewed at the end of each financial year.

De-recognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in the statement of profit and loss, when the asset is derecognised.

b) Intangible assets

The cost comprises purchase price including any import duties and other taxes (other than those subsequently recoverable from taxation authorities), borrowing cost if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use.

d) Revenue recognition

Revenue (other than for those items to which Ind AS 109 Financial Instruments are applicable) is measured at fair value of the consideration received or receivable. Ind AS 115, Revenue from contracts with customers, outlines a single comprehensive model of accounting for revenue arising from contracts with customers.

The Company recognises revenue from contracts with customers based on a five step model as set out in Ind AS 115:

Step 1: Identify contract(s) with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.

Step 2: Identify performance obligations in the contract: A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer.

Step 3: Determine the transaction price: The transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties.

Step 4: Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the Company allocates the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Company expects to be entitled in exchange for satisfying each performance obligation.

The Company recognises revenue from the following sources:

i. Interest income

Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin. Interest income are recognised using the effective interest method (EIR). Calculation of the EIR includes all fees received or cost incurred that are incremental and directly attributable to the acquisition of a financial asset. Interest income is calculated by applying the EIR to the gross carrying amount of non-credit impaired financial assets.

ii. Net gain on fair value changes

The Company designates certain financial assets for subsequent measurement at fair value through profit or loss (FVTPL) or fair value through other comprehensive income (FVOCI). The Company recognises gains on fair value change of financial assets measured at FVTPL and realised gains on derecognition of financial asset measured at FVTPL and FVOCI on net basis.

iii. Dividend income

iv. Fees and commission income

Revenue from fee and commission is measured at fair value of the consideration received or receivable. Revenue is recognised as and when the Company satisfies the associated performance obligation in accordance with the identified contract with the customers and when there is no uncertainty in the ultimate realisation/collection

v. Income from assignment

Gains arising out of direct assignment transactions comprise the difference between the interest on the loan portfolio and the applicable rate at which the direct assignment is entered into with the assignee, also known as the right of excess interest spread (EIS). The future EIS basis the scheduled cash flows on execution of the transaction, discounted at the applicable rate entered into with the assignee is recorded upfront in the statement of profit and loss and correspondingly EIS receivable is recognised under head other financial asset. EIS evaluated and adjusted for ECL and expected prepayment.

e) Borrowing costs

Borrowing costs that are directly attributable to the acquisition and/or construction of a qualifying asset, till the time such qualifying assets become ready for its intended use sale, are capitalised. f) Taxation

Tax expense recognised in Statement of Profit and Loss comprises the sum of deferred tax and current tax except to the extent it recognised in other comprehensive income or directly in equity.

Current tax comprises the tax payable or receivable on taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. Current tax is computed in accordance with relevant tax regulations. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received after considering uncertainty related to income taxes, if any. Current tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity).

Current tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

Deferred tax is recognised in respect of temporary differences between carrying amount of assets and liabilities for financial reporting purposes and corresponding amount used for taxation purposes. Deferred tax assets are recognised on unused tax loss, unused tax credits and deductible temporary differences to the extent it is probable that the future taxable profits will be available against which they can be used. This is assessed based on the Company's forecast of future operating results, adjusted for significant non-taxable income and expenses and specific limits on the use of any unused tax loss. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date to recover or settle the carrying amount of its assets and liabilities. Deferred tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously. Deferred tax relating to items recognised outside statement of profit and loss is recognised outside statement of profit or loss (either in other comprehensive income or in equity).

g) Employee benefits

Short-term employee benefits

Short-term employee benefits comprise of employee costs such as salaries, bonus etc. is recognised on the basis of the amount paid or payable for the period during which services are rendered by the employee.

Other long-term employee benefits

The Company also provides the benefit of compensated absences to its employees which are in the nature of long-term employee benefit plan. Liability in respect of compensated absences becoming due and expected to availed after one year from the balance sheet date is estimated in the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method as on the reporting date. Actuarial gains and losses arising from past experience and changes in actuarial assumptions are charged to Statement of Profit and Loss in the year in which such gains or losses are determined.

Post-employment benefit plans are classified into defined benefits plans and defined contribution plans as under:

Defined contribution plans

The Company has a defined contribution plans namely provident fund, pension fund and employees state insurance scheme. The contribution made by the Company in respect of these plans are charged to the Statement of Profit and Loss.

Defined benefit plans

The Company has unfunded gratuity as defined benefit plan where the amount that an employee will receive on retirement is defined by reference to the employee's length of service and final salary. The liability recognised in the balance sheet for defined benefit plans as the present value of the defined benefit obligation (DBO) at the reporting date. Management estimates the DBO annually with the assistance of independent actuaries. Actuarial gains/losses resulting from re-measurements of the liability are included in other comprehensive income.

h) Share based payments

Share based compensation benefits are provided to employees via Dhani Services Limited (Formerly known as Indiabulls Ventures Limited) ('Holding Company') Employee Stock Option Plans (ESOPs). The employee benefits expense is measured using the fair value of the employee stock options and is recognised over vesting period with a corresponding increase in equity. The vesting period is the period over which all the specified vesting conditions are to be satisfied. On the exercise of the employee stock options, the employees of the Company will be allotted Holding Company's equity shares.

i) Impairment of non-financial assets

At each reporting date, the Company assesses whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset. Recoverable amount is higher of an asset's net selling price and its value in use. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the Statement of Profit and Loss. If at the reporting date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount.

j) Impairment of financial assets

Loan assets

The Company follows a 'three-stage' model for impairment based on changes in credit quality since initial recognition as summarised below:

- Stage 1 (1-30 days) includes loan assets that have not had a significant increase in credit risk since initial recognition or that have low credit risk at the reporting date.
- Stage 2 (31-60 days) includes loan assets that have had a significant increase in credit risk since initial recognition but that do not have objective evidence of impairment.
- Stage 3 (more than 90 days) includes loan assets that have objective evidence of impairment at the reporting date.

The Expected Credit Loss (ECL) is measured at 12-month ECL for Stage 1 loan assets and at lifetime ECL for Stage 2 and Stage 3 loan assets. ECL is the product of the Probability of Default, Exposure at Default and Loss Given Default, defined as follows:

Probability of Default (PD) - The PD represents the likelihood of a borrower defaulting on its financial obligation (as per "Definition of default and credit-impaired" above), either over the next 12 months (12 months PD), or over the remaining lifetime (Lifetime PD) of the obligation.

Loss Given Default (LGD) - LGD represents the Company's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and preference of claim and availability of collateral or other credit support.

Exposure at Default (EAD) - EAD is based on the amounts the Company expects to be owed at the time of default. For a revolving commitment, the Company includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.

Forward-looking economic information is included in determining the 12-month and lifetime PD, EAD and LGD. The assumptions underlying the expected credit loss are monitored and reviewed on an ongoing basis.

Other financial assets

In respect of its other financial assets, the Company assesses if the credit risk on those financial assets has increased significantly since initial recognition. If the credit risk has not increased significantly since initial recognition, the Company measures the loss allowance at an amount equal to 12-month expected credit losses, else at an amount equal to the lifetime expected credit losses.

When making this assessment, the Company uses the change in the risk of a default occurring over the expected life of the financial asset. To make that assessment, the Company compares the risk of a default occurring on the financial asset as at the balance sheet date with the risk of a default occurring on the financial asset as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition. The Company assumes that the credit risk on a financial asset has not increased significantly since initial recognition if the financial asset is determined to have low credit risk at the balance sheet

Write-offs

Financial assets are written off either partially or in their entirety to the extent that there is no realistic prospect of recovery. Any subsequent recoveries are credited to impairment on financial instrument on statement of profit and loss.

k) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term highly liquid investments (certificate of deposits) that are readily convertible into known amount of cash and which are subject to an insignificant risk of changes in value. For cash flow statement purposes, cash and cash equivalents includes bank overdrafts that are repayable on demand and form an integral part of the Company's cash management.

l) Equity investment in associate/subsidiaries

Investments representing equity interest in associate or subsidiaries is measured at cost in accordance with Ind AS 27 'Separate Financial Statements'.

m) Provisions, contingent assets and contingent liabilities

Provisions are recognised only when there is a present obligation, as a result of past events, and when a reliable estimate of the amount of obligation can be made at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates. Provisions are discounted to their present values, where the time value of money is material.

Contingent liability is disclosed for:

- Possible obligations which will be confirmed only by future events not wholly within the control of the Company or
- Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

Contingent assets are neither recognised nor disclosed except when realisation of income is virtually certain, related asset is disclosed.

n) Financial instruments

A Financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Initial recognition and measurement

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value adjusted for transaction costs. Subsequent measurement of financial assets and financial liabilities is described below.

Non-derivative financial assets

Subsequent measurement

i. Financial assets carried at amortised cost – a financial asset is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in interest income in the Statement of Profit and Loss.

ii. Financial assets carried at fair value through other comprehensive income (FVOCI):

A financial asset is measured at FVOCI if both the following conditions are met:

- (a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows and selling financial assets, and
- (b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

FVOCI instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI. Interest income and impairment gains or losses are recognised in the statement of profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified to the statement of profit or loss.

iii. Investments in equity instruments – Investments in equity instruments which are held for trading are classified as at fair value through profit or loss (FVTPL). For all other equity instruments, the Company makes an irrevocable choice upon initial recognition, on an instrument by instrument basis, to classify the same either as at fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL). Amounts presented in other comprehensive income are not subsequently transferred to profit or loss. However, the Company transfers the cumulative gain or loss within equity. Dividends on such investments are recognised in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment.

iv. Investments in mutual funds – Investments in mutual funds are measured at fair value through profit and loss (FVTPL).

De-recognition of financial assets

Financial assets (or where applicable, a part of financial asset or part of a group of similar financial assets) are derecognised (i.e. removed from the Company's balance sheet) when the contractual rights to receive the cash flows from the financial asset have expired, or when the financial asset and substantially all the risks and rewards are transferred. Further, if the Company has not retained control, it shall also derecognise the financial asset and recognise separately as assets or liabilities any rights and obligations created or retained in the transfer.

Non-derivative financial liabilities

Subsequent measurement

Subsequent to initial recognition, all non-derivative financial liabilities are measured at amortised cost using the effective interest method.

De-recognition of financial liabilities

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Financial guarantee

Financial guarantee contracts are recognised as financial liability at the time guarantee is issued. The liability is initially measured at fair value and subsequently measured at higher of:

- The amount of loss allowance (calculated as described in policy for impairment of financial assets)
- The amount initially recognised less, where appropriate, cumulative amount of income recognised in accordance with principles of Ind AS.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

o) Earnings per equity share

Basic earnings per equity share is calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events including a bonus issue.

For the purpose of calculating diluted earnings per equity share, the net profit or loss (interest and other finance cost associated) for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

p) Segment reporting

The Company identifies segment basis the internal organization and management structure. The operating segments are the segments for which separate financial information is available and for which operating profit/loss amounts are regularly reviewed by the CODM ('chief operating decision maker') in deciding how to allocate resources and in assessing performance.

q) Foreign currency

Functional and presentation currency

Items included in the standalone financial statement of the Company are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The standalone financial statements have been prepared and presented in Indian Rupees (₹), which is the Company's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency, by applying the exchange rates on the foreign currency amounts at the date of the transaction. Foreign currency monetary items outstanding at the balance sheet date are converted to functional currency using the closing rate. Non-monetary items denominated in a foreign currency which are carried at historical cost are reported using the exchange rate at the date of the transaction.

Exchange differences arising on monetary items on settlement, or restatement as at reporting date, at rates different from those at which they were initially recorded, are recognised in the Statement of Profit and Loss in the year in which they arise.

r) **Classification of leases -**

The Company enters into leasing arrangements for various premises. The assessment (including measurement) of the lease is based on several factors, including, but not limited to, transfer of ownership of leased asset at end of lease term, lessee's option to extend/terminate etc. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to extend or to terminate.

Recognition and initial measurement

At lease commencement date, the Company recognises a right-of-use asset and a lease liability on the balance sheet. The right-of-use asset is measured at cost, which is made up of the initial measurement of the lease liability, any initial direct costs incurred by the Company, an estimate of any costs to dismantle and remove the asset at the end of the lease (if any), and any lease payments made in advance of the lease commencement date (net of any incentives received).

Subsequent measurement

The Company depreciates the right-of-use assets on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The Company also assesses the right-of-use asset for impairment when such indicators exist.

At lease commencement date, the Company measures the lease liability at the present value of the lease payments unpaid at that date, discounted using the interest rate implicit in the lease if that rate is readily available or the Company's incremental borrowing rate. Lease payments included in the measurement of the lease liability are made up of fixed payments (including in substance fixed payments) and variable payments based on an index or rate. Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest. It is re-measured to reflect any reassessment or modification, or if there are changes in in-substance fixed payments. When the lease liability is re-measured, the corresponding adjustment is reflected in the right-of-use asset.

The Company has elected to account for short-term leases using the practical expedients. Instead of recognising a right-of-use asset and lease liability, the payments in relation to these are recognised as an expense in statement of profit and loss on a straight-line basis over the lease term.

s) **Significant management judgement in applying accounting policies and estimation uncertainty**

The preparation of the Company's standalone financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the related disclosures. Actual results may differ from these estimates.

Significant management judgements

Recognition of deferred tax assets - The extent to which deferred tax assets can be recognised is based on an assessment of the probability of the future taxable income against which the deferred tax assets can be utilized.

Business model assessment - The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Company monitors financial assets measured at amortised cost that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Company's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the

Evaluation of indicators for impairment of assets - The evaluation of applicability of indicators of impairment of assets requires assessment of several external and internal factors which could result in deterioration of recoverable amount of the assets.

(This space has been intentionally left blank)

ANNEXURE V - Summary of significant accounting policies and other explanatory information to Reformatted Standalone Financial Information

Expected credit loss ('ECL') - The measurement of expected credit loss allowance for financial assets measured at amortised cost requires use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. likelihood of customers defaulting and resulting losses). The Company makes significant judgements with regard to the following while assessing expected credit loss:

- Determining criteria for significant increase in credit risk;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.

Provisions - At each reporting date basis the management judgment, changes in facts and legal aspects, the Company assesses the requirement of provisions against the outstanding contingent liabilities. However, the actual future outcome may be different from this judgement.

Significant estimates

Useful lives of depreciable/amortisable assets - Management reviews its estimate of the useful lives of depreciable/amortisable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical and economic obsolescence that may change the utility of assets.

Defined benefit obligation (DBO) - Management's estimate of the DBO is based on a number of underlying assumptions such as standard rates of inflation, mortality, discount rate and anticipation of future salary increases. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expenses.

Fair value measurements - Management applies valuation techniques to determine the fair value of financial instruments (where active market quotes are not available). This involves developing estimates and assumptions consistent with how market participants would price the instrument.

t) New Accounting Pronouncement

On 24 March 2021, the Ministry of Corporate Affairs ("MCA") through a notification, amended Schedule III of the Companies Act, 2013. The amendments revise Division I, II and III of Schedule III and are applicable from 1 April 2021. Key amendments relating to Division III which relate to financial statements for a Non-Banking Financial Company (NBFC) which are required to comply with Companies (Indian Accounting Standards) Rules 2015 are:

Balance Sheet

- Lease liabilities should be separately disclosed under the head 'financial liabilities', duly distinguished as current or non-current.
- Certain additional disclosures in the statement of changes in equity such as changes in equity share capital due to prior period errors and restated balances at the beginning of the current reporting period.
- Specified format for disclosure of shareholding of promoters.
- Specified format for ageing schedule of trade receivables, trade payables, capital work-in-progress and intangible asset under development.
- If a company has not used funds for the specific purpose for which it was borrowed from banks and financial institutions, then disclosure of details of where it has been used.
- Specific disclosure under 'additional regulatory requirement' such as compliance with approved schemes of arrangements, compliance with number of layers of companies, title deeds of immovable property not held in name of company, loans and advances to promoters, directors, key managerial personnel (KMP) and related parties, details of benami property held etc.

Statement of profit and loss:

- Additional disclosures relating to Corporate Social Responsibility (CSR) and undisclosed income specified under the head 'additional information' in the notes forming part of the standalone financial statements.

The amendments are extensive and the Company will evaluate the same to give effect to them as required by law.

*During the year ended 31 March 2020, the Company has entered into series of bilateral assignment transactions against outstanding loan portfolio. In the light of this, the management has concluded that the business model for loan against property, business installments loan and personal loan has changed from "hold to collect" to "hold to collect and sell". Accordingly, the company had reclassified its eligible portfolio from amortised category to fair value through other comprehensive income (FVOCI) category and hence recorded a fair value gain in other comprehensive income.

C **Other long-term employee benefit plans**

The Company provides for compensated absences to its employees. The employees can carry-forward a portion of the unutilised accrued compensated absences and utilise it in future service periods or receive cash compensation on termination of employment. Since the compensated absences do not fall due wholly within twelve months after the end of the period in which the employees render the related service and are also not expected to be utilized wholly within twelve months after the end of such period, the benefit is classified as a long-term employee benefit. The Company records an obligation for such compensated absences in the period in which the employee renders the services that increase this entitlement. The scheme is unfunded and liability for the same is recognised on the basis of actuarial valuation. A provision ₹ (15.75) Millions (31 March 2020: ₹ 59.27 Millions, Rs. 15.72 Millions) for the year have been made on the basis of actuarial valuation at the year end and debited to the Statement of Profit and Loss.

Leases

The Company has leases for office buildings. With the exception of short-term leases and leases of low-value underlying assets, each lease is reflected on the balance sheet as a right-of-use asset and a lease liability. Variable lease payments which do not depend on an index or a rate are excluded from the initial measurement of the lease liability and right of use assets. The Company classifies its right-of-use assets in a consistent manner to its property, plant and equipment.

Each lease generally imposes a restriction that, unless there is a contractual right for the Company to sublease the asset to another party, the right-of-use asset can only be used by the Company. Some leases contain an option to extend the lease for a further term. The Company is prohibited from selling or pledging the underlying leased assets as security. For leases over office buildings and other premises the Company must keep those properties in a good state of repair and return the properties in their original condition at the end of the lease. Further, the Company is required to pay maintenance fees in accordance with the lease contracts.

I Impact on transition

- 1 Effective 1 April 2019, the Company has adopted Ind AS 116 "Leases" and applied modified retrospective approach to all lease contracts existing as at 1 April 2019. On transition, the adoption of new standard resulted in recognition of lease liability of ₹ 2,188.83 million and corresponding right of use asset of ₹ 2,210.32 million.
- 2 For contracts in place as at 1 April 2019, Company Group has elected to apply the definition of a lease from Ind AS 17 and has not applied Ind AS 116 to arrangements that were previously not identified as lease under Ind AS 17.
- 3 The Company has elected not to include initial direct costs in the measurement of the right-of-use asset for operating leases in existence at the date of initial application of Ind AS 116, being 1 April 2019.
- 4 Instead of performing an impairment review on the right-of-use assets at the date of initial application, the Company has relied on its historic assessment as to whether leases were onerous immediately before the date of initial application of Ind AS 116.
- 5 On transition, for leases previously accounted for as operating leases with a remaining lease term of less than 12 months and for leases of low-value assets the Group has applied the optional exemptions to not recognise right-of-use assets but to account for the lease expense on a straightline basis over the remaining lease term.
- 6 For those leases previously classified as finance leases, the right-of-use asset and lease liability are measured at the date of initial application at the same amounts as under Ind AS 17 immediately before the date of initial application.
- 7 The following is a reconciliation of total operating lease commitments at 31 March 2019 (as disclosed in the financial statements for the year ended 31 March 2019) to the lease liabilities recognised at 1 April 2019:

B Fair values hierarchy

Financial assets and financial liabilities are measured at fair value in the financial statements and are grouped into three Levels of a fair value hierarchy. The three Levels are defined based on the observability of significant inputs to the measurement, as follows:

The categories used are as follows:

Level 1: Quoted prices (unadjusted) for identical instruments in an active market;

Level 2: Directly (i.e. as prices) or indirectly (i.e. derived from prices) observable market inputs, other than Level 1 inputs; and

Level 3: Inputs which are not based on observable market data (unobservable inputs).

Valuation process and technique used to determine fair value

Specific valuation techniques used to value financial instruments include:

(a) the use of quoted market prices for quoted equity instruments and debt securities.

(b) the use of quoted market prices for derivative contracts at balance sheet date.

(c) the use of net asset value for certificate of deposits and mutual funds on the basis of the statement received from investee party.

b) Movement of loans measured using unobservable inputs (Level 3):

The management assessed that fair values of cash and cash equivalents, other financial assets and other financial liabilities approximate their respective carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

Financial instruments measured at fair value and fair value of financial instruments carried at amortized cost

Type	Valuation technique	Significant unobservable input	Inter-relationship between significant unobservable inputs and fair value and sensitivity
Financial assets and liabilities measured at amortized cost	Discounted cash flows: The valuation model considers the present value of expected receipt/payment discounted using appropriate discounting rates	Not applicable	Not applicable
Financial assets measured at FVTPL	NAV based method.	Not applicable	Not applicable
Financial assets measured at FVOCI	Discounted cash flows: The valuation model considers the present value of expected receipt/payment discounted using appropriate discounting rates	The discount rate is the average lending rate at which the loans are disbursed	There is an inverse correlation. Higher the discount rate i.e average lending rate for the disbursed loans, lower the fair value of the assets

C) Market risk

Market risk is the risk that the value of on and off-balance sheet positions of a financial institution will be adversely affected by movements in market rates or prices such as interest rates, foreign exchange rates, equity prices, credit spreads and/or commodity prices resulting in a loss to earnings and capital.

The Company's exposure to market risk is primarily on account of interest rate risk and price risk

a) Interest rate risk

i) Liabilities

The Company's policy is to minimise interest rate cash flow risk exposures on long-term financing. As at 31 March 2021, the Company is exposed to changes in market interest rates borrowings other than debt securities at variable interest rates.

ii) Assets

The Company's term deposits and commercial paper/deposits are carried at amortised cost and are fixed rate deposits. They are therefore not subject to interest rate risk as defined in Ind AS 107, since neither the carrying amount nor the future cash flows will fluctuate because of a change in market interest rates.

(All amounts are in Indian Rupees in millions unless stated otherwise)

Note - 50**Transferred financial assets****A) Securitisation**

In the course of its finance activity, the Company makes transfers of financial assets, where legal rights to the cash flows from the asset are passed to the counterparty and where the Company retains the rights to the cash flows but assumes a responsibility to transfer them to the counterparty.

The Company has securitized its loan assets to an unrelated and unconsolidated entities. As per the terms of the agreements, the Company is exposed to first loss default guarantee and cash collateral amounting in range of 14% to 18% of the amount securitised and therefore continues to be exposed to significant risk and rewards relating to the underlying receivables. Hence, these loan assets are not derecognised and proceeds received are presented as other financial liability.

The following tables provide a summary of financial assets that have been transferred in such a way that part or all of the transferred financial assets do not qualify for derecognition, together with the associated liabilities:

Securitisations	As at	As at	As at
	31 March 2021	31 March 2020	31 March 2019
Gross carrying amount of securitised assets	3,172.16	8,911.25	4,219.70
Gross carrying amount of associated liabilities	4,083.88	9,215.60	4,082.86
Carrying value and fair value of securitised assets	4,893.50	9,256.79	4,311.20
Carrying value and fair value of associated liabilities	4,083.88	9,215.60	4,082.85
Net position	809.62	41.19	228.35

B) Assignment

During the year ended March 31, 2020, the Company has sold certain loans by way of direct bilateral assignment, as a source of finance. As per the terms of such deals, since the derecognition criteria as per Ind AS 109 are met, (including transfer of substantial risks and rewards) relating to assets being transferred to the buyer, the assets have been derecognised from the books of the Company.

The table below summarises the carrying amount of the derecognised financial assets measured at amortised cost and the gain/(loss) on derecognition.

Particulars	As at	As at	As at
	31 March 2021	31 March 2020	31 March 2019
Carrying amount of de-recognised financial asset	3,671.10	58,883.79	6,064.81
Gain on sale of the de-recognised financial asset	254.97	6,166.90	315.80

Since the Company has derecognized the above loan assets in entirety, the whole of the interest spread at the present value (discounted over the expected life of the assets) is recognised on the date of derecognition itself as interest-only strip receivable and corresponding profit on derecognition of financial assets is recognized in the Statement of Profit and Loss.

Fair value hedges

A Risk management strategy

The use of derivatives can give rise to price risk. The use of derivative instruments is subject to limits, authorities and regular monitoring by appropriate levels of management. The limits, authorities and monitoring systems are periodically reviewed by management and the Board. The price risk on derivatives is mitigated by changes in the valuation of the underlying assets, liabilities or transactions, as derivatives are used only for risk management purposes. The Company uses derivative instruments as part of its management of exposure to fluctuations in market price of equity investments. The derivative transactions are normally in the form of futures and these are subject to the Company guidelines and policies.

B Hedge relationship

The Company had done investment in shares of Reliance Industries Limited. The Company enters into selling of future of Reliance Industries Limited to hedge its price risk. Gains and losses on these hedge transactions are substantially offset by the amount of gains or losses on the underlying assets. Net gains and losses are recognised in the statement of profit and loss.

Hedge ratio is the relationship between the quantity of the hedging instrument and the quantity of the hedged item. In the case, total principal payments under the transaction is hedged with futures of the equivalent amount and at the same dates. Hence the entity hedge 100% of its exposure on the transaction and is considered highly effective. The Company has entered into nifty future contracts which provide an economic hedge to a risk component of a transaction.

ANNEXURE V - Summary of significant accounting policies and other explanatory information to Reformatted Standalone Financial Information

(All amounts are in Indian Rupees in millions unless stated otherwise)

Note - 55

Consequent to the outbreak of the COVID-19 pandemic, the Indian Government announced a lockdown in March 2020. Subsequently, the national lockdown was lifted by the Government, but regional lockdowns continue to be implemented in areas with a significant number of COVID-19 cases. The impact of COVID-19, including changes in customer behavior and pandemic fears, as well as restriction of business and individual activities led to significant volatility in global and Indian financial markets and a significant decrease in global and local economic activities. This may lead to a rise in the number of borrower defaults and consequently an increase in corresponding provisions. The extent to which COVID-19 pandemic, including the current "second wave" that has significantly increased the number of cases in India, will continue to impact the Company's performance and will depend on ongoing as well as future developments which are highly uncertain, including, among other things, any new information concerning the severity of the COVID-19 pandemic and any action to contain its spread or mitigate its impact whether government-mandated or elected by us.

The Company has recognized provisions as on 31 March 2021 towards its loan assets, based on the information available at this point of time, in accordance with the expected credit loss method. The Company believes that it has considered all the possible impact of the known events arising out of COVID-19 pandemic in the preparation of standalone financial statements. However, the impact assessment of COVID-19 is a continuing process given its nature and duration. The Company will continue to monitor any material changes to future economic condition.

- Consequent to the outbreak of the COVID-19 pandemic, the Indian Government announced a lockdown in March 2020. Subsequently, the national lockdown was lifted by the Government, but regional lockdowns continue to be implemented in areas with a significant number of COVID-19 cases. The impact of COVID-19, including changes in customer behavior and pandemic fears, as well as restriction of business and individual activities led to significant volatility in global and Indian financial markets and a significant decrease in global and local economic activities. This may lead to a rise in the number of borrower defaults and consequently an increase in corresponding provisions. The extent to which COVID-19 pandemic, including the outbreak in December 2021 due to a new variant, that has significantly increased the number of cases in India, will continue to impact the Company's performance and will depend on ongoing as well as future developments which are highly uncertain, including, among other things, any new information concerning the severity of the COVID-19 pandemic and any action to contain its spread or mitigate its impact whether government-mandated or elected by us.

The Company has recognized provisions as on 31st December 2021 towards its loan assets, based on the information available at this point of time, in accordance with the expected credit loss method. The Company believes that it has considered all the possible impact of the known events arising out of COVID-19 pandemic in the preparation of financial results. However, the impact assessment of COVID-19 is a continuing process given its nature and duration. The Company will continue to monitor any material changes to future economic condition.

The Company's capital and liquidity position remains sufficient and would continue to be the focus area for the Company; accordingly, the Company does not expect a stress on its liquidity situation in the immediate future.
- The Government of India, Ministry of Finance, vide its notification dated 23rd October 2020, had announced COVID-19 Relief Scheme ("the Scheme") for grant of exgratia payment being difference between compounded interest and simple interest for six months period from 1st March 2020 to 31st August 2020 to eligible borrowers as per the Scheme. The management has credited the differential interest in the borrower accounts in line with the requirement of the Scheme and does not have any impact on the financial results. The Company has received the entire amount from Government of India as on 31st March 2021.
- The figures for the Quarter ended 31st December 2021 and 31st December 2020 are the balancing figures between the reviewed figures for the Nine-Months ended 31st December 2021 and the un-audited figures for 31st December 2020 and the reviewed figures for the Half-year ended 30th September 2021 and 30th September 2020 respectively.

- 7 The Indian Parliament has approved the code on Social Security 2020 which would impact the contributions by the Company towards Provident Funds and Gratuity. The Ministry of Labour and Employment has released draft rules for the code on Social Security, 2020 on 13th November 2020 and has invited suggestions from stakeholders which are under active Considerations by the Ministry. The Company will assess the impact and its evaluation once the subject rules are notified and will give appropriate impact in its financial results in the period in which, the code becomes effective and the related rules to determine the financial impact are published.
- 8 Non-convertible debentures are secured by way of first ranking pari passu charge on the current assets (including investments) of the Company, both present and future; and on present and future loan assets of the Company, including all monies receivable for the principal amount and interest thereunder to the extent as stated in the information memorandum. SEBI disposed of the adjudication proceedings by its order dated April 27, 2018.
2. SEBI conducted Inspection of Stock broking/ DP Operations for DSL in December 2019 and communicated its findings thereto via a letter dated April 20, 2020, alleging non-compliance with Clause A (2) and A (5) of Code of Conduct under Schedule II of SEBI (Stock Broker) Regulations, 1992, that speak about exercise of due care and skill and compliance with statutory requirements by a stock broker, and the SEBI circulars dated April 23, 2010 and August 31, 2010 on execution of power of attorney by a client in favour of the stock broker, and Clause 2.2.1 (f) and (g) of SEBI Master Circular SEBI/HO/MIRSD/DOS3/CIR/P/2018/104 dated July 04, 2018 on client due diligence.

They had observed that there are sufficient grounds to inquire and adjudicate upon the alleged violations of the Minimum Standards for Code of Conduct to Regulate, Monitor and Report Trading by Insiders and the PTI Regulations and accordingly appointed an adjudicating officer by a communication order dated July 17, 2020 and issued this Show Cause Notice to call upon the Noticees to show cause as to why an enquiry should not be held against them. BASIS OF ALLOTMENT

Basis of Allotment for NCDs

The Registrar will aggregate the Applications, based on the applications received through an electronic book from the Stock Exchange and determine the valid Application for the purpose of drawing the basis of allocation.

Allocation Ratio

The Registrar will aggregate the Applications based on the Applications received through an electronic book from the Stock Exchange and determine the valid applications for the purpose of drawing the basis of allocation. Grouping of the application received will be then done in the following manner:

Grouping of Applications and Allocation Ratio: Applications received from various applicants shall be grouped together on the following basis:

- (a) Applications received from Category I applicants: Applications received from Category I, shall be grouped together, (“Institutional Portion”);
- (b) Applications received from Category II applicants: Applications received from Category II, shall be grouped together, (“Non-Institutional Portion”);
- (c) Applications received from Category III applicants: Applications received from Category III, shall be grouped together, (“High Net-Worth Individual Portion”).
- (d) Applications received from Category IV applicants: Applications received from Category IV, shall be grouped together, (“Retail Individual Portion”).

For removal of doubt, “*Institutional Portion*”, “*Non-Institutional Portion*”, “*High Net-Worth Individual*” and “*Retail Individual Portion*” are individually referred to as “*Portion*” and collectively referred to as “*Portions*”.

For the purposes of determining the number of NCDs available for allocation to each of the abovementioned Portions, our Company shall have the discretion of determining the number of NCDs to be Allotted over and above the Base Issue Size, in case our Company opts to retain any oversubscription in the Issue up to ₹2,000 million. The

aggregate value of NCDs decided to be allotted over and above the Base Issue Size, (in case our Company opts to retain any oversubscription in the Issue), and/or the aggregate value of NCDs up to the Base Issue Size shall be collectively termed as the “Overall Issue Size”.

Basis of Allotment for NCDs

Allotments in the first instance:

- (i) Applicants belonging to the Category I, in the first instance, will be allocated NCDs up to [●]% of overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each Application duly acknowledged by the Lead Managers and their respective affiliates/SCSB (Designated Branch or online acknowledgement));
- (ii) Applicants belonging to the Category II, in the first instance, will be allocated NCDs up to [●]% of overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each Application duly acknowledged by the Members of the Syndicate/Trading Members/SCSB (Designated Branch or online acknowledgement));
- (iii) Applicants belonging to the Category III, in the first instance, will be allocated NCDs up to [●]% of overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each Application duly acknowledged by the Members of the Syndicate/Trading Members/SCSB (Designated Branch or online acknowledgement));
- (iv) Applicants belonging to the Category IV, in the first instance, will be allocated NCDs up to [●]% of overall Issue Size on first come first serve basis (determined on the basis of date of receipt of each Application duly acknowledged by the Members of the Syndicate/Trading Members/SCSB (Designated Branch or online acknowledgement));

Allotments, in consultation with the Designated Stock Exchange, shall be made on date priority basis i.e., a first-come first-serve basis, based on the date of upload of each Application in to the electronic book with Stock Exchange, in each Portion subject to the Allocation Ratio. However, on the date of oversubscription, the Allotments would be made to the Applicants on proportionate basis.

- (a) Under Subscription:

Under subscription, if any, in any Portion, priority in Allotments will be given in the following order:

- (i) Retail Individual Portion
- (ii) High Net-Worth Individual Portion
- (iii) Non-Institutional Portion;
- (iv) Institutional Portion

Within each Portion, priority in Allotments will be given on a first-come-first-serve basis, based on the date of upload of each Application into the electronic system of the Stock Exchange.

For each Portion, all Applications uploaded into the electronic book with the Stock Exchange would be treated at par with each other. Allotment would be on proportionate basis, where Applications uploaded into the Platform of the Stock Exchange on a particular date exceeds NCDs to be allotted for each Portion, respectively.

Minimum allotment of 10 NCD and in multiples of 1 (one) NCD thereafter would be made in case of each valid Application.

- (b) Allotments in case of oversubscription:

In case of an oversubscription, Allotments to the maximum extent, as possible, will be made on a first-come first-serve basis and thereafter on proportionate basis, i.e. full Allotment of NCDs to the valid Applicants

on a first come first serve basis for forms uploaded up to 5 pm of the date falling 1 (one) day prior to the date of oversubscription and proportionate allotment of NCDs to the valid Applicants on the date of oversubscription (based on the date of upload of the Application on the Stock Exchange Platform, in each Portion). In case of over subscription on date of opening of the Issue, the Allotment shall be made on a proportionate basis. Applications received for the NCDs after the date of oversubscription will not be considered for Allotment.

In view of the same, the Investors are advised to refer to the website of the Stock Exchanges for details in respect of subscription.

(c) Proportionate Allotments: For each Portion, on the date of oversubscription:

(i) Allotments to the Applicants shall be made in proportion to their respective Application size, rounded off to the nearest integer;

(ii) If the process of rounding off to the nearest integer results in the actual allocation of NCDs being higher than the Issue Size, not all Applicants will be allotted the number of NCDs arrived at after such rounding off. Rather, each Applicant whose Allotment size, prior to rounding off, had the highest decimal point would be given preference;

(iii) In the event, there are more than one Applicant whose entitlement remain equal after the manner of distribution referred to above, our Company will ensure that the Basis of Allotment is finalised by draw of lots in a fair and equitable manner; and

(d) Applicant applying for more than one Series of NCDs:

If an Applicant has applied for more than one Series of NCDs, and in case such Applicant is entitled to allocation of only a part of the aggregate number of NCDs applied for, the Series-wise allocation of NCDs to such Applicants shall be in proportion to the number of NCDs with respect to each Series, applied for by such Applicant, subject to rounding off to the nearest integer, as appropriate in consultation with the Lead Managers and Designated Stock Exchange. Further, in the aforesaid scenario, wherein the Applicant has applied for all the [●] Series and in case such Applicant cannot be allotted all the [●] Series, then the Applicant would be allotted NCDs, at the discretion of the Company, the Registrar and the Lead Managers as may be decided at the time of Basis of Allotment.

All decisions pertaining to the Basis of Allotment of NCDs pursuant to the Issue shall be taken by our Company in consultation with the Lead Manager, and the Designated Stock Exchange and in compliance with the aforementioned provisions of this Draft Prospectus.

Details of facilities are in Annexure 1

Rating Rationale

The above rating of the Non-Convertible Debentures and bank facilities of Dhani Loans and Services Limited (DLSL) continues to derive strength from experienced promoters backed by reputed board members, comfortable capitalization and strong resource-raising ability, strong linkage & support from the Promoters, improved gearing parameters and improved operating income parameters. The rating is however constrained by reduction in loan portfolio, moderate asset quality, significant amount of impairment losses, impact of COVID-19 global pandemic and competitive nature of industry.

Key Rating Sensitivities:

➤ **Upward Rating Factor:**

Substantial scaling up of its operations and diversifying its loan portfolio geographically, while maintaining the asset quality indicators, adequate capital position and profitability.

Press Release

➤ **Downward Rating Factor:**

Adverse movement in the collection efficiency which impacts the asset quality significantly thereby increasing the credit cost for the Company.

Detailed Description of Key Rating Drivers

Key Rating Strengths

Experienced promoters backed by reputed board members:

DLSL's promoter is Dhani Services Limited (formerly Indiabulls Ventures Limited) ('DSL'). Mr. Pinank Jayant Shah, aged 41 years, is a Whole-time Director on the Board and Chief Executive Officer of the Company. He holds a bachelor's degree in commerce from Mumbai University and a master's degree in management studies (Finance) from Jamnalal Bajaj Institute of Management Studies. He has over 18 years of experience in retail lending, corporate lending and fund raising.

He is also one of the Executive Director of the parent company DSL. All the remaining board members also well qualified and have vast experience in their respective fields and contribute significantly in the overall growth of the Company. The company shall benefit from the strong experience of its professional management team which will enable them to scale-up its operations while managing the risks inherent in this type of business.

Comfortable capitalization and strong resource-raising ability:

DLSL has comfortable capitalization primarily supported by steady capital infusion from the promoter group. The Company's Tangible Net Worth stood at INR 4263.37 Crore as at H1-FY21 as against INR 4183.52 Crore as at March 31, 2020. DLSL has been able to obtain continuous funding support from its promoters as well as investors. During the six months ended 30-Sep-2020, the Company has issued & allotted NCDs (privately placed) worth INR 500 Crore.

Considering the scale of operations as on March 31, 2020, the company is well capitalized with a CAR (%) of 58.92%. Also, it has adequately matched asset liability profile as on September 30, 2020.

Press Release

Strong linkage & support from the Promoters

Dhani Loans & Services Limited is a wholly-owned subsidiary of Dhani Services Limited (DSL) (Formerly Indiabulls Ventures Limited). Dhani Services Ltd. is a consumer business that operates through its app 'Dhani' and provides digital healthcare and digital transactional finance to its customers. The equity shares of DSL are listed on NSE and BSE and its Global Depository Receipts are listed on the Luxembourg Stock Exchange.

DSL has raised multiple rounds of capital through placement of its equity shares to specialist tech enabled investors. The last round of such capital was a raise of 80 mn USD in Sep/Oct 2020. During FY19, the Holding Company (DSL) infused equity capital of INR 2,302.75 Crore into DLSL.

Improved Gearing parameters

The Overall Gearing ratio has improved significantly from 1.75x as at FY19 to 1.14x as at FY20 & further to 0.94x as at half year ended Sep-20, as the borrowings reduced over the years.

Improved operating income parameters

The Company interest income has increased by almost 20% in FY20 from FY19. The Net Interest margin (NIM) has seen improvement given the increase in Net Interest Income while having a moderate level of loan book as on March 31, 2020. The NIM was 12.51% in FY19, which improved to 13.89% in FY20.

Key Rating Weaknesses

Reduction in loan portfolio:

Decline in loan portfolio is due to sale of loan assets by way of Assignment, subsequently resulting in de-recognition of such assets from the books of the Company. The gain on sale of loan portfolio through assignment amounted to INR 616.69 Crore in FY20.

The Company has also securitized its loan assets to unrelated entities. These loan assets are not derecognized and proceeds received are presented as other financial liability.

The own book portfolio reduced from INR 10,633 Crore (AUM – INR 11,228 Crore) as at FY19 to INR 4,710 (AUM – INR 9,626 Crore) as at FY20.

Press Release

Moderate Asset Quality:

The Gross NPAs increased in percentage terms to 1.93% in FY20 when compared to 0.80% in FY19 while the Net NPA levels stood at 0.74% in FY20 and 0.25% in FY19. This is largely due to the reduction in the portfolio size. The ability to grow its loan book while maintaining low delinquency levels remains to be seen. Given that the portfolio has grown aggressively only post lockdown (i.e. May 2020), the portfolio has not yet seen one complete cycle. The company's ability to manage the asset quality while growing its portfolio is a key rating sensitivity.

Significant amount of impairment losses

There has been a significant amount of impairment on financial assets in FY20 of INR 816.25 Crore as against INR 103.01 Crore in FY19. Out of INR 816 Crore in FY20, loans written off amounted to INR 362 Crore and Covid related provision amounted to INR 390 Crore.

Impact of COVID-19 global pandemic

COVID-19, a global pandemic has contributed to a significant decline and volatility in global & Indian markets and a significant decrease in economic activity. The Company's businesses are expected to be impacted by lower lending opportunities and decline in collection efficiencies.

However, the Company's capital & liquidity position remains strong. The Overall Gearing ratio improved from 1.14x as at Mar-20 to 0.94x as at Sep-20. Pursuant to RBI's circular, the Company had extended moratorium to its borrowers in accordance to their board approved policies. Around 28% of the loans were under moratorium. Collection Efficiency has also started improving post COVID-19. The company expects only around 5% of the loans to come under restructuring.

Competitive nature of industry:

DLSL is exposed to stiff competition from other NBFCs and banks. The lending industry focused around SMEs and small ticket loans is highly fragmented with unorganized lenders also vying for the same set of borrowers. However, DLSL's professional management and

Press Release

focused approach towards SME lending and conservative underwriting policy standards is expected to grow its business while mitigating the risks.

Analytical Approach & Applicable Criteria:

- Standalone
- Rating methodology for Financial Institutions/NBFCs
- Financial ratios and Interpretation (Financial Sector)
